BUILDING OPERATIONS

SOUTH AUSTRALIA

MARCH QUARTER 1963

SCOPE

This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period January 1958 to March 1963 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in Local Government areas. The information has been compiled from returns collected from all builders of "new buildings".

DEFINITIONS

NEW BUILDINGS: Additions of £5,000 and over to existing buildings (other than houses) are included, but minor additions, alterations, repairs and renovations, and all construction activity such as railways, bridges, earthworks, water storage, etc., are excluded.

VALUE: All values shown exclude the value of land and, except for Table 4, represent the value of buildings upon completion (but see also **COMPLETIONS**). The values shown in Table 4 represent the value of work done on new buildings during the period.

COMMENCEMENTS: A building is recorded as commenced when work on the foundations has begun.

UNDER CONSTRUCTION: Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

COMPLETIONS: A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

COMMENTS

Table 1 shows that 2,300 houses were commenced and 2,213 completed during March quarter 1963, a decrease of 144 commencements and 267 completions on figures for the previous quarter. Both the number of houses commenced and the number of houses completed were the lowest since March quarter 1962 when the corresponding figures were 2,168 and 1,838.

The considerable fluctuations from period to period in the value of "new buildings other than dwellings" in Table 3 are partly the result of the unequal incidence of individual large contracts. Table 4, which shows the value of work done on the various types of new buildings during each period, is not subject to these fluctuations.

There was a decrease in the number recorded as employed on all jobs of builders of new buildings (Table 6). The total of 13,338 at 29th March 1963 was 104 less than at 12th December 1962 but 1,384 more than at 30th March 1962.

As shown in Table 7 a large proportion of home building is concentrated within a few local government areas. During the twelve months ended 31st March last 3,801 (73.9 per cent) of dwellings completed in metropolitan local government areas were in the Municipal Corporations of Campbelltown, Enfield, Marion, Mitcham, West Torrens, and Woodville; of dwellings completed outside the metropolitan area 63.2 per cent were in the near metropolitan District Councils of Munno Para, Noarlunga, Salisbury, and Tea Tree Gully.

SPY HANDBOOK

1. The first step in the process of espionage is the selection of a target. This is usually done by the intelligence agency, but it can also be done by the spy himself. The target should be someone who has access to the information that is being sought.

2. Once a target has been selected, the next step is to establish contact with the target. This is usually done through a third party, known as a handler or a contact. The contact should be someone who is trusted by both the spy and the target.

3. After contact has been established, the next step is to gain the trust of the target. This is usually done by providing the target with information that is of interest to them. This information should be provided in a way that makes the target feel that the spy is a friend and not an enemy.

4. Once the target's trust has been gained, the next step is to begin the process of espionage. This is usually done by providing the target with information that is of interest to the intelligence agency. This information should be provided in a way that makes the target feel that the spy is a friend and not an enemy.

5. The final step in the process of espionage is the transmission of the information to the intelligence agency. This is usually done through a third party, known as a handler or a contact. The contact should be someone who is trusted by both the spy and the target.

6. After the information has been transmitted, the next step is to maintain contact with the target. This is usually done through a third party, known as a handler or a contact. The contact should be someone who is trusted by both the spy and the target.

7. The final step in the process of espionage is the transmission of the information to the intelligence agency. This is usually done through a third party, known as a handler or a contact. The contact should be someone who is trusted by both the spy and the target.

8. The final step in the process of espionage is the transmission of the information to the intelligence agency. This is usually done through a third party, known as a handler or a contact. The contact should be someone who is trusted by both the spy and the target.

- (a) An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction by sub-contract or day-labour but without the services of a contractor who is responsible for the whole job.
- (b) Of the 8,879 brick, stone, etc. houses COMMENCED during 1962 (8,436 contract-built and 443 owner-built) 986 were of brick veneer and stone veneer construction valued at £2,971,000. During March quarter 1963 there were 254 houses of this type commenced with a value of £835,000.
- (c) "Other" houses are mainly of fibro-cement or weatherboard construction, e.g. included in the 694 "other" type houses COMMENCED during 1962 (613 contract-built and 81 owner-built) 639 were of fibro-cement construction valued at £1,719,000, and 51 of weatherboard with a value of £161,000. During March quarter 1963 there were 140 (£388,000) fibro-cement and 13 (£45,000) weatherboard houses commenced.

Builders' Labourers	2,190	2,250	1,837	1,981	1,891	1,905	1,910	1,886
Other	2,314	2,503	2,116	2,101	2,274	2,242	2,475	2,513
Total	13,117	14,081	12,034	11,954	12,346	12,834	13,442	13,338

(a) Covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
